16 mm (0.6") ball joint head

Four-leaf barndoor

Reflectors

Honeycomb (egg crate)

Gelframe

Radio remote control

BALL JOINT HEADS

The ball joint head will assist you in turning Nesys lights in any direction you want. So they are optimal for using on location. Besides: in studios with low-hung ceilings they have also proved excellent – one saves about 30 cm (almost 1 ft) in height!

The Nesys ball joint heads are available with a 16mm (0.6") (Nesylite) or 28 mm (1.1") (Nesyflex) spigot.

FOUR-LEAF BARNDOORS (for Nesyflex)

The barndoors are simply inserted into the holder on the light. Two safety fastenings ensure that the barndoor stays in place. The barndoors can also be equipped with reflectors and thus provide a 30% higher light output.

HONEYCOMB (EGG CRATE)

Reduces the radiating angle to about 80°. Decreases luminous intensity by only 1/2 aperture.

GELFRAME

Divisible gelframe to be inserted into guides.

RADIO REMOTE CONTROL

With Nesys radio remote control you can operate up to 1,000 units, also in groups.

LIGHTING WITH SYSTEM

To enable you to vary the range of possible uses for the rich assortment of Nesys lights fast and at a low price, we also offer you a broad variety of accessories.

You can therefore add to your lighting equipment to suit your personal requirements and enabling you to meet the growing demands on the set and in studios.

The Nesys logo, featuring the brand name in a stylized, blue, cursive font.

S-yoke (for Nesysflex)

Yoke with pole operation

Tripod 001

Tripod 007

Case (without accessories)

We continue to develop our products on an ongoing basis. Please appreciate the necessity for changes to the data or design. Status 09/2002

S-YOKE (for Nesysflex)

With the S-yoke you can conveniently direct any Nesys light 30° further down. If you use the ball joint head in addition, you can use the light both horizontally and vertically.

YOKE

Nesys lamps can be supplied with manual or pole-operated yokes (pan and tilt).

TRIPODS

- Aluminium tripod 001 (for Nesylite 110/220)
- Aluminium tripod 007 (for Nesysflex 110/220/330/440)
- Aluminium tripod 269U (w/o illustration) (for Nesysflex 440/660)

CASE

Of course, the lights fit perfectly into the Nesys cases. They protect both lights and accessories such as manual controls, spare lamps, barn-door screens, gelframes, ball joint head, and other grip equipment. The cases can carry up to two lights with accessories. In the accessories compartment there is also room for two lightweight tripods (Type 001). We also supply cases for only one lamp plus accessories.
